Fax: (925) 447-6589

THOMAS A. BRAUN, P.E.

Curriculum Vitae

EDUCATION:

B.S. Mechanical/Aeronautical Engineering, University of California, Davis 1987

PRESENT POSITION:

Boster, Kobayashi & Associates, Livermore, CA: 1993 - Present

A consulting firm specializing in the technical aspects of accident reconstruction, failure analysis, highway design and injury causation. Typical assignments involve application of laws of physics and principles of engineering to vehicular accident reconstruction and product design/defect analysis.

Have analyzed over 2800 cases and provided testimony regarding:

- Accident reconstruction (including cars, trucks, trailers, buses, motorcycles, ATV's, bicycles, pedestrians, heavy equipment, forklifts, scissorlifts, pallet trucks)
- Event Data Recorders
- Brake systems (hydraulic, electric and air brake systems)
- Occupant kinematics and restraint system analysis
- Human factors (perception/reaction, visibility)
- Product design/defect analysis, machine guarding, safety and warnings
- Scaffolding and ladders
- Sound levels

REGISTRATION:

Registered Professional Mechanical Engineer
State of California
Certificate Number M 028822

PROFESSIONAL SOCIETY MEMBERSHIPS:

Tau Beta Pi National Engineering Honor Society
Society of Automotive Engineers
American Society of Mechanical Engineers
Society of Forensic Engineers and Scientists

PREVIOUS POSITIONS:

Allied Signal Aerospace Company, Torrance, CA: 1988 - 1993

Senior Development Engineer. Participated in the design and development of electro-mechanical actuation systems. Supervised and performed detail design and analysis of geartrains, transmission systems, and electric motor drives, including stress, controls, thermal, and reliability aspects. Developed proposal and product layouts. Analyzed and dispositioned non-conforming hardware. Conducted qualification test programs to verify compliance with customer requirements.

Lawrence Livermore National Laboratory, Livermore, CA: 1986

Engineering Assistant. Assisted in the development of synchrotron radiation lab test facility. Assembled, programmed, and tested a three-axis indexing system used for beamline positioning. Held Department of Energy security clearance.

AWU Honors Undergraduate Fellowship, LLNL, Livermore, CA: 1984, 1985

Investigated material strength properties of polymer microspheres at cryogenic temperatures. Conducted high-pressure testing and scanning electron microscope analysis of test specimens.

SPECIALIZED TRAINING AND EXPERIENCE:

EDR Summit – 2018, 2019, 2020

Houston, TX

A three-day summit focusing on Event Data Recorder (EDR) research, collection, and analysis for vehicle crash investigation.

Accessing and Interpreting Heavy Vehicle Event Data Recorders – 2014

Society of Automotive Engineers

FARO Laser Scanning – Focus 3D and SCENE Software Training – 2014

Essentials of PC-CRASH - 2011

Accessing and Interpreting Heavy Vehicle Event Data Recorders – 2010

Society of Automotive Engineers

Crash Data Retrieval System Technician and Data Analyst Certification Course - 2008

Vehicle Dynamics & Handling Seminar – 2006

Infineon Raceway, Sonoma, CA

SPECIALIZED TRAINING AND EXPERIENCE: (continued)

The Role of Warnings and Instructions – 2006

Dept. of Engineering, University of Wisconsin – Madison

Hazard analysis, design and development of warnings and instructions, standards, assessing the effectiveness of warnings

Vehicle Dynamics & Handling Seminar – 2005

ESPN Russell Racing Schools – Infineon Raceway, Sonoma, CA

DDEC Reports/Data Extraction – 2004

Detroit Diesel Corporation, Detroit, MI

Trained to perform data extraction and analysis for the Detroit Diesel Electronic Controls (DDEC) system data recording devices, including the use of DDEC Reports and Detroit Diesel Diagnostic Link (DDDL) software.

Crash Data Retrieval System Operator Certification – 2004

PC-CRASH Advanced Workshop - 2003

PC-CRASH/PC-RECT Training Seminar – 2002

Trained in the use of 2D/3D accident reconstruction simulation software (PC-CRASH) and photogrammetry software (PC-RECT).

Crash Data Retrieval System Training Seminar– 2001

Vetronix Corporation

SAE 2001 World Congress

Detroit, MI

Attended technical sessions on Vehicle Dynamics & Simulation, Biomechanics, Safety Test Methodology, Side Impact, Rear Impact and Rollover.

HVE Forum - 2000

Engineering Dynamics Corporation

HVE-2D (**H**uman-**V**ehicle-**E**nvironment) is a computer simulation environment for studying interactions between vehicles and their environments. HVE-2D allows the user to create models of vehicles and environments and study their interaction using HVE-2D compatible reconstruction and simulation models. Workshops attended:

Theoretical and Applied Vehicle Dynamics Part 1 and 2 (Vehicle Dynamics and Accident Reconstruction) – topics included tire mechanics, vehicle dynamics, dynamic/transient handling models

EDCRASH for HVE-2D – (**E**ngineering **D**ynamics **C**orporation **R**econstruction of **A**ccident **S**peeds on the **H**ighway)

SPECIALIZED TRAINING AND EXPERIENCE: (continued)

EDSVS & EDVTS for HVE-2D – (Engineering Dynamics Corporation Single Vehicle Simulator and Vehicle Trailer Simulator)

Advanced HVE-2D Parts I to IV – advanced case study including use of EDCRASH, EDSMAC, EDSVS, environments, friction zones

Introduction to Elevators and Escalators – 1997

American Society of Mechanical Engineers

Design and operation of elevators and escalator systems, including electric elevators, hydraulic elevators for freight and passenger applications, and escalators.

Elevator Maintenance Evaluation – 1997

American Society of Mechanical Engineers

Procedures and methods for evaluating elevator maintenance, elements of accepted maintenance practices, preventive maintenance procedures, and evaluation of electrical and mechanical components.

Biomechanics of Injury Causation - 1994

University of Northern California

A two day workshop presenting the biomechanics of injury causation and emerging issues in biomechanics. Topics included injuries of the head, neck, spine & brain, and analysis of restraint systems, air bag injuries, and low-speed rear-end impacts.

Automotive Technology: Brake Systems and Safety - 1994

Los Positas College, Livermore, CA

Study of brake system theory and braking systems on cars. Repair and adjustment of complete systems and components.

Total Quality Leadership Training - 1992

Allied Signal, Torrance, CA

Trained in the use of total quality tools as a means to reduce product defects, increase productivity, improve customer satisfaction, and reduce cycle times.

Industrial Hydraulics Technology - 1991

National Technology Transfer Inc., Denver, CO

A twenty-one hour course in the design, analysis, and application of hydraulic components and systems.

PUBLICATIONS AND PRESENTATIONS:

“Black Box Update – EDR’s, 49 CFR Part 563, and the CDR System”, Caltrans Tort Workshop, May 2014

“Accident Reconstruction Issues in Commercial Vehicle Accidents”, California Trucking Association, Northern Safety & Maintenance Management Council, April 2010

"Black Box Update", Society of Forensic Engineers & Scientists, September 2007

“Accident Reconstruction and Vehicle Dynamics Analysis Using EDR Data”, CAOC College of Trial Arts Vehicle Dynamic and Handling Seminar, August 2006

"Analysis of Vehicle Dynamics and Applications in Accident Reconstruction", CAOC College of Trial Arts Vehicle Dynamics and Handling Seminar, August 2005

"EDR Use in Motor Vehicle Accident Reconstruction", Hawaii Claim Association Annual Seminar, 17 September 2004

"Forensic Investigations of Automobile Accidents", Claims Conference of Northern California, Sacramento, 14 September 2004
